

IS NIR Spectra

Polymers, Additives (1740 spectra)

The NIR sublibrary "IS NIR Polymers, Additives (1740 spectra)" has been designed for polymer industry, recycling industry, packing material industry, coatings industry and other laboratories who use their NIR spectrometer for studying of polymers, polymer additives and other polymer related materials.

The near infrared spectral library „IS NIR Spectra“ is a unique collection of NIR (near infrared) digital spectra. The spectra have been collected in range 4200-10000 cm⁻¹ (=2.4 – 1 micrometers).

„IS NIR Spectra“ is the biggest and newest NIR library available on the market. This spectral library has been designed for users who use their NIR spectrometer not only for quantitative and chemometric analysis, but also want to identify unknown samples or just want to use the library as reference spectra database.

IS means "Integrating Sphere" and at the same time "Identify Sample".

Technical parameters:

The „IS NIR Spectra“ were collected using the FT-NIR Spectrometer equipped with Integrating Sphere Accessory.

Resolution: standard 4cm⁻¹

Customized resolution: upon special request the spectra can be delivered in customized resolution to reach better correspondence with spectra collected by customer NIR instrument

Spectral range in wavenumbers units: 4200-10000 cm⁻¹

Spectral range in wavelength units: 2.4 – 1 micrometers

Only one spectrum/compound covering the mentioned spectral range

Typical text information about the sample includes (when available):

Compound name including synonyms

CAS number

Chemical formula

Molecular weight

Additional information about the sample like manufacturer and comments.

Download a free NIR library of 30 NIR spectra to check the compatibility of you instrument with the „IS NIR Spectra“.

Samples were selected and NIR spectra collected 2010-2012.

ftir@ftir.cz

ftirspectra@gmail.com

This library is available as digital searchable library compatible with your spectroscopic software. Visit the „Download“ section of our webpage to select the correct library format. The spectra are available in wavenumbers (cm-1) units or wavelength (micrometer) units. Also the library can be delivered with SEARCH software or in *.pdf format (if you do not have a spectroscopic software).

The near infrared spectral library „IS NIR Spectra“ can be purchased as a complete collection of over 6049 spectra or as following application specific sublibraries.

Ordering Code	Library Name	Number of Spectra
ISNNCM-X	IS NIR Complete Collection	6049
IS NIR Sublibraries*:		
ISNNST-X	IS NIR Starter	1043
ISNNPH-X	IS NIR Pharma, Drugs	1340
ISNNPO-X	IS NIR Polymers, Additives	1740
ISNNHA-X	IS NIR Hazardous, Toxic	1718
ISNNDY-X	IS NIR Dyes, Pigments	1005

* all sublibraries spectra are included in the complete collection ISNNCM-X and have the same technical parameters
