

NICODOM IR Polymers Advanced (5288 Spectra)

The infrared spectral library „NICODOM IR Polymers Advanced“ is an advanced spectral database of 5288 FTIR (ATR) digital spectra of polymers, polymers additives, fibers, coatings, pigments, dyes and other related compounds used in polymer industry.

Examples of compound types:

- Polymers Additives (Acidity regulator, Inorganics, Adhesion Promotor, Aftertreatment agent for dyeings, Thinner, Wetting and dispersing agent, Anti bleeding agent, Anti gelling agent, Anti separation Additive, Anti settling Additive, Anti skinning agent, Antistatic Agent, Binder, Catalyst, Coalescent, Combination drier, Crease-prevention agent, Crosslinker, Deaerator, Defoamer, Dispersing Additive, Dyeing Auxiliaries, Emulsifier, Filler, Fixing agent, Flow and Leveling Additive, Foam Control Agents, Glue, Hardener, High Mw Dispersant, High temperature grease, Hydrophobizing agent, Chelating agent, Inhibitor and chelating agent, Interfacial Tension Modifier, Levelling Additive, Low foaming dispersing agent, surfactants, Moisture Scavenger, Moth and Beetle-proofing Agents for Wool, Oil, Pigment wetting Additive, Plasticizer, dispersant, Pot-life retarder, Preservative, Reactive Flexibizer/Diluent, Retarder for dyeing acrylic fibers, Rheology Additive, Scouring/wetting agent, Scratch and slip Additive, Slip and anti blocking agent, Slip and Flow Additive, Softener, Stabiliser, Surfactant, Thickener, Retarder, UV stabilizer, Wax, Wetting Agent
- Natural and synthetic polymers (Cellulose derivatives, PES, PEG/PPG, Acrylates, PA, PB, PE, PP, PS, PU, Siloxanes, Halogenated polymers, Vinyl polymers, Resins synthetic and natural, Rubbers, Alkyds...)
- Copolymers (ABS, Acrylates, BS, EPDM, EVA, PEPP, SAN...)
- Monomers
- Fibers (Acetate, Acrylic, Animal, Natural, Nylon, Olefin, Polyester, Rayon, Mixed Fibers, and most other fiber types)
- Dyes and Pigments (Acid Dyes, Basic Dyes, Direct Dyes, Disperse Dyes, Fluorescent Brightener, Food Dyes, Mordant Dyes, Natural Dyes, Pigments (Pigment Synthetic, Pigment Japanese, Pigment Mineral, Pigment Historic, Pigment Earth, Pigment Inorganic, Pigment Glitter, Pigment Fluorescent), Reactive Dyes, Solvent Dyes, VAT Dyes, Ceramic Colorants)

The Nicodom FTIR spectra of polymers were collected using the FTIR Spectrometer Nexus 670™ (Thermo) and the Miracle™ single bounce ATR accessory (Pike Technologies) equipped by ZnSe or Si crystal.

The Nicodom spectral library of polymers features resolution of 4cm⁻¹ in the spectral range 600-4000 cm⁻¹, measurement time 1 minute, the instrument was purged by dried air.

Typical information about the sample contains:

Name
CAS Number
Chemical Formula
Sample Type
Trade Name
Manufacturer

The infrared spectral library package „NICODOM IR Polymers Advanced“ is delivered as four separate spectral libraries.

- “NICODOM IR Polymers” (1615 spectra)
- “NICODOM IR Fibers” (457 spectra)
- “NICODOM IR Coatings” (1816 spectra)
- “NICODOM IR Dyes and Pigments” (1400 spectra)

This allows you to search in separate libraries, in group of libraries or in all libraries.

Legend of following list:

Spectrum present in NICODOM Polymers Basic	Y
Spectrum NOT present in NICODOM Polymers Basic	N
Spectrum present in NICODOM Polymers Extended	Y
Spectrum not present in NICODOM Polymers Extended	N
Spectrum present in NICODOM Polymers Plus	Y
Spectrum not present in NICODOM Polymers Plus	N
B = NICODOM Polymers Basic	
E= NICODOM Polymers Extended	
P= NICODOM Polymers Plus	

All 5288 spectra in following list are included in „NICODOM IR Polymers Advanced“. Some of the following spectra are also included in other Nicodom polymer library packages (see the legend).
